Subject index

Acacia
Combretum, proposis, identification and discrimination, natural gums, classification 337
Acacia senegal
gum arabic, classification, natural gums 255
Annealing
structural change, gellan hydrogel 387
Aqueous solution
gellan, osmotic pressure measurements 397
gellan, structure 373
gellan, ultrasonic velocities 407
gellan, viscoelastic properties 417
viscoelastic properties, concentration, effects on gelation, gellan 435

Biosynthesis
optimization, xanthan 299

Carrageenan
gellan, MnII binding, ESR studies 427
Casein
calcium chloride, temperature, preheat treatments, pH, effects on aggregation 113
β-casein
water-soluble surfactant, competitive adsorption, air–water interface, neutron reflectivity study 497
Characterization
gum arabic, *Acacia senegal* (L) Willd. 521
Classification
natural gums, Acacia, Combretum, proposis, identification and discrimination 337
natural gums, *Acacia senegal*, gum arabic 255
natural gums, gum arabic, amino-acid compositions 157
Combretum
Acacia, proposis, identification and discrimination, natural gums, classification 337

Deesterification
pectins, purification and 103
Dextran
interfacial pressure of adsorbing layers, influence, 11S globulin, n-decane/aqueous solution interface 1
Dynamic viscoelastics
mixed system, konjac glucomannan, kappa carrageenan, deformation 213

Elastin
pepsin-solubilized, water/oil emulsifier 327
Emulsification
protein, evaluation, conductivity 241
Emulsifier
water/oil, pepsin-solubilized elastin 327
Emulsion gels
viscoelasticity, filler effects, oil droplets 227
Emulsions
fat globule concentration, prediction under gravity 123
stabilization by vegetable proteins, mechanisms 55
Esterification
pectins, thermal stability, chain conformation 91
Euclidean modelling
gum arabic, commercial from Africa, identification 507

Fat globule concentration
emulsions under gravity, prediction 123
Filler effects
oil droplets, viscoelasticity, emulsion gels 227

Gelatinization
hydroxypropylcellulose, starch, interactions 181
Gelation
concentration effects on, gellan, aqueous solution, viscoelastic properties 435
Gellan
aqueous solution, osmotic pressure measurements 397
aqueous solution, structure 373
aqueous solution, ultrasonic velocities 407
aqueous solution, viscoelastic properties, concentration, effects on gelation 435
aqueous solution, viscoelastic properties 417
carrageenan, MnII binding 427
gum gels, potassium ions, rheological and thermal properties 449
hydrogel, annealing, structural change 387
light scattering, gelling process 363
Gelling process
light scattering, gellan 363
11S globulin
dextran, interfacial pressure of adsorbing layers, influence, n-decane/aqueous solution interface 1
Gum arabic
Acacia senegal, classification, natural gums 255
Acacia senegal (L) Willd., characterization 521

amino-acid compositions, natural gums classification 157
characterization, experimental field (North Senegal) 319
commercial from Africa, identification, Euclidean modelling, natural gums classification 507
natural gums, chemometric study 73
Hydrocolloid–NaCl solutions
sodium concentration, ^{23}Na NMR molecular mobility studies 147
Hydroxypropylcellulose
starch, interactions, gelatinization 181

Image analysis
particle size distribution 11

Kappa carrageenan
konjac glucomannan, dynamic viscoelastics, deformation, mixed system 213
Konjac glucomannan
kappa carrageenan, dynamic viscoelastics, deformation, mixed system 213

β-lactoglobulin gels
microstructure, rheological behaviour 195
Light scattering
gellan, gelling process 363

Microstructure
rheological behaviour, β-lactoglobulin gels 195
Milk/soya protein systems
structural properties, yellow fat spreads 459
MnII binding
gellan, carrageenan, ESR studies 427

Natural gums
classification, gum arabic, amino-acid compositions 157
gum arabic, chemometric study 73

Oil droplets
filler effects, oil droplets, emulsion gels 227
Osmotic pressure measurements
aqueous solution, gellan 397

Particle size distribution
image analysis 11
Pectins
esterification, thermal stability, chain conformation 91
purification and deesterification 103
sidechains, plant cell walls and food, role 39
Polyfructan
synthesis, from sucrose *Aspergillus sydowi* conidia, characteristics and applications 23
Potassium ions
rheological and thermal properties of gellan gum gels 449
Proposis
Acacia, Combretum, identification and discrimination, natural gums, classification 337
Protein foam stability
determination, time-dependent pressure monitoring 307

Rheological behaviour
microstructure, β-lactoglobulin gels 195
single particles, xanthan with locust bean gum, sedimentation 285
Rheological studies
salt-soluble proteins, porcine muscles 137
starch–fatty acid gels 479

Salt-soluble proteins
porcine muscles, rheological studies 137
Sedimentation
single particles, xanthan with locust bean gum, rheological behaviour 285
Sidechains
pectins, plant cell walls and food, role 39
Starch
hydroxypropylcellulose, interactions, gelatinization 181
Starch–fatty acid gels
rheological studies 479
Sucrose
polyfructan, synthesis by *Aspergillus sydowi* conidia, characteristics and applications 23

Water-soluble surfactant
β-casein, competitive adsorption, air–water interface, neutron reflectivity study 497

Xanthan
biosynthesis, optimization 299
Xanthan with locust bean gum
sedimentation, single particles, rheological behaviour 285

Yellow fat spreads
milk/soya protein systems, structural properties 459
